D. Introductions

E. Presentations
(10 Minutes for presentation, 5 minutes for questions)

- Recommendations for the 2016 GSS Executive Elections

  Presenter: Patrick Lo, Chief Electoral Officer for 2015 GSS Executive Elections.

  - Presented proposal by Elections Committee for 2015 GSS Executive Elections; report has been also submitted to the Code and Policy for further review as procedures and forms comprise sections and appendices of the Policy Manual.
  - Changes are outlined as current and proposed policies;
  - Nomination form (proposed) will ask for cell-phone number and email info instead of home/work phone number and website; re-phrased last sentence to make it more informative about the deadline and location of the GSS office.
  - Ballot layout: applies to both paper (has not been used for a while) and electronic format, contains option for re-open nominations and abstain. There was some confusion last year; proposed format has definitions included for the voting options available.
  - Preliminary Results (proposed): will add percentages and more figures all over the place; make results more informative to address concerns over lack of transparency;
  - Elections Procedure (proposed): move reporting at the Council meeting following the elections. Originally voting was held in January, now moved to March to align with the AMS Elections; February reporting does not make sense anymore as it is in essence before the elections.
  - All candidates meeting (proposed): to have at least one session with an option to have as many additional sessions on- and off-campus as needed.
  - Deadline (proposed): will allow extension when required; any decisions made by the committee have to be reported to Council; Last year three positions had 0 applications that’s why committee decided to extend nominations period for 1 week.
  - Other (proposed): changes to the appendices numbering; ballot rules apply to paper ballots where possible, minor changes, etc.

Questions & Answers

It was suggested setting deadline at 5 pm to avoid confusion. It was further discussed voting options on the ballot and emphasized on the difference between casting abstaining vote and re-open nominations. It was further noted
that if a grad student chooses to abstain from all other options available, he/she is considered an elector (a recorded abstention) and a graduate student, who does not vote at all, isn’t.

It was further asked and answered that elections committee decides on any additional sessions of the all candidates meetings to be held either on- or off-campus.

It was also asked about the examples when voters had been coerced and/or pressured to cast their vote in a particular way, and made reference to the complaints from 2015 Elections. It was also noted that some people choose to use different words to describe unwanted behavior in favor of one candidate over another; both terms fall under one umbrella.

It was lastly suggested using the guidelines of Elections Canada.

Motion to extend time for 5 minutes.

MOVER: Tobias Friedel SECONDER: Hamza Khan

It was also discussed about the layout of the paper ballots and the ways how it can be seen as one that favours one candidate over another. It was further mentioned that the layout of the ballot is an appendix of the Policy Manual. It suggests using randomized name order.

Therefore, we’re discussing policy changes to increase the TOEFL requirement at the university level.

3 Report by Hooman S.; for more details: amsrep@gss.ubc.ca
A second major topic was the Graduate Supervision Leadership Initiative, which aims to “improve UBC graduate pedagogy and practices,” experiment with new approaches, and form a community of practice. The Faculty is compiling the data from various experiments and writing it up – a document that will be interesting to read. Part of what they want to do is develop guidelines for evaluating supervision and looking at which metrics to use. Finally, we discussed UBC’s collective scholarship results. UBC is #1 in Canada for Vanier scholarships and #2 nationally, including other national Doctoral scholarships and Master’s level funding. U of T is #1 overall, BUT (in case it’s a competition), UBC has more Vaniers in each funding agency that U of T. So ha. We’re doing great.”
